

## **RAF Technology Introduces Argosy Mobile™ powered by Smart Match™ for Advanced Mobile Computers**

REDMOND, WA. September 25, 2009. RAF Technology, Inc., the leading provider of data capture and management software to the postal industry, announces the release of Argosy Mobile™ powered by Smart Match™, the newest release of RAF's advanced address recognition and verification software for advanced rugged mobile devices. Argosy Mobile™ powered by Smart Match™ provides mobile workforces in postal, courier, field services, transportation and logistics industries the first solution to capture and verify addresses in one simple step, reducing data input time and ensuring accurate destinations. Argosy Mobile™ powered by Smart Match™ enables companies with mobile workforces the latest technology to enhance worker productivity and improve delivery effectiveness.

“With today’s advances in mobile computing, technologies which were once limited to high powered computers are now available to mobile workers anywhere, anytime,” said Dave Reeves, CEO of RAF Technology. “We are pleased to offer the latest advanced address recognition and verification technology to enhance the efficiency and productivity of companies with mobile workforces. Argosy Post powered by Smart Match offers companies with mobile workers the ability to extract and validate address data with the push of a button – enhancing mobile workforce efficiency and eliminating nonproductive manual hours resolving bad addresses.”

### **Argosy Mobile™ powered by Smart Match™ for Advanced Mobile Computers**

Argosy Mobile™ powered by Smart Match™ takes advantage of today’s advanced mobile computer devices to maximize the effectiveness of the mobile workforce.

Argosy Mobile™ powered by Smart Match™:

- Instantly extracts address data
- Automatically corrects address errors
- Seamlessly integrates real-time routed address data to any 3rd party back office application
- Immediately captures address and barcode data in one simple transaction
- Provides customized outputs from multiple customer data sources (e.g. GPS coordinates)

RAF will be demonstrating the product in the Intermec booth at the Post Expo 2009 trade show in Hannover, Germany on September 29th to October 1st, and will be demonstrating at the American Trucking Association conference in Las Vegas on October 4th to 7th, 2009.

#### About RAF

RAF Technology, Inc. is a world-wide leader in advanced pattern and image recognition, intelligent information extraction and data verification solutions for enterprises, government agencies and postal authorities. Established in 1989, RAF revolutionized the world of high performance optical recognition software with its breakthrough pattern recognition capabilities. Today, RAF provides flexible software solutions that enable organizations to more effectively process mail, capture relevant information and verify data to reduce costs, increase productivity and grow revenue.
