

RAF Smart Match® CASS Cycle N

REDMOND, WA. April 15, 2011. RAF Technology, Inc., the leading provider of Data Capture and Management software for the Postal & Courier industry, announces the release of Smart Match® 3.0.0.02.N which is certified for CASS™ Cycle N. Smart Match® 3.00.02.N is the newest release of our advanced address recognition software for Multi-line Optical Character Recognition (MLOCR) systems, and is fully integrated into RAF's Argosy Post 3.56 Platinum high speed OCR software.

"We are pleased to offer CASS™ Cycle N months in advance of the United States Postal Service deadline which ensures our customers will have adequate time to upgrade all their systems," said Brian Elmenhurst Director OCR Technologies.

Smart Match® 3.00.02.N provides the industry's highest assignment read rates with the lowest number of errors. It was designed to be the most intelligent directory retrieval system that can easily manage a variety of mail processing applications by accessing millions of address records without compromising processing speed or accuracy.

Highlight of new features:

Fuzzy Matching Address Correction: Automatically adapts and corrects various degrees of address corruption.

Automatic Noise Cancellation: Eliminates unwanted character noise which reduces processing errors.

Alias Recognition: Differentiates multiple aliases for a name (e.g. abbreviations, or historic names)

Address Look-up: Provides an address & reverse look-up utility which can be used to analyze routing issues.

SuiteLink™: Full Implementation supported

Recognition: Improves OCR read rates

Multi directional mail handling: Enhances performance

About RAF

RAF Technology, Inc. is a world-wide leader in advanced pattern and image recognition, intelligent information extraction and data verification solutions for enterprises, government agencies and postal authorities. Established in 1989, RAF revolutionized the world of high performance optical recognition software with its breakthrough pattern recognition capabilities. Today, RAF provides flexible software solutions that enable organizations to more effectively process mail, capture relevant information and verify data to reduce costs, increase productivity and grow revenue.
